BAFFLES SUPRAVOX®

BAFFLES COMPENSES®

Better than the REFLEX baffles and other systems, these baffles were made to obtain the maximum of our exponential drivers. The must of this type of baffle, is that you have an excellent result in the bass even with a little volume: 90 to 150 dm³.

Based on our experience (registered they are 30 years), these cheaper baffles allow an ideal reproduction of all the acoustic range without "box" noise. The sound-damping is made with shred glass wool or shred paper..

These baffles were optimized only for the SUPRAVOX® exponential drivers

* This assembly is made for Ø 215 RTF or Ø 215 double cone
